Note about Photo Print Enlargements

Both Packages include one printed enlargement. To print your landmark event, we use cutting edge print technology that surpasses that offered by the typical High street photo printer. The standard enlargement that's included in both the Silver & Gold Packages is an 8"x10" print (approx A4 size) printed on beautiful **Ilford Smooth Pearl** paper. This is a satin finish professional, archive quality photographic paper with better skin tones and detail, allowing you to share, look back on, savour and appreciate your performance time and time again for years to come. Additional print enlargement sizes and prices are on the next page if you'd like extras.

Delivery of Digital Images

Apart from the live shoot itself, the first step is delivery of a digital, multi image proof sheet via an email link to our dropbox service, Digital Pigeon where you can preview low resolution unprocessed digital thumbnails of all images of you (showing your competitor number). This allows you to select your preferred poses and angles. Your selection then goes through final processing, including cropping & light correction, to achieve best results. The final processed high resolution images are then delivered to you via the same dropbox link.

Delivery of Enlargements

Prints can either be collected free from Lyttelton, or posted to you via NZ Post, or delivered by courier (recommended for fragile photographic material). Courier presently costs \$9 in the general Christchurch area and \$14 in rural Canterbury. For more distant locations, please ask.

Additional Print Enlargements
